DRESHER, Montgomery County, PENNSYLVANIA

TRADE LIST

Fall, 1908

IN preparing this, our Trade List for Fall, 1908, we have aimed to present our large collection of Hardy Ornamentals to the purchaser in the most concise form. With this object in mind and in view of the fact that it is intended for the trade, illustrations and descriptions have been purposely omitted.

Customers are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named we forward to the best of our judgment.

Responsibility—After goods are placed on board cars here we assume no responsibility for their safe or prompt delivery, or any injury caused by delay in delivery by the transportation company.

All Claims MUST BE MADE UPON RECEIPT OF GOODS.

Terms Cash, on or before delivery to express or railroad agents, unless by special arrangement.

Any quantity will be furnished at the rate quoted per 100, but single plants of one or more varieties will not be sold at less than 15 cents each net, except Vines and Herbaceous Plants, the minimum net price of which will be 10 cents each net.

Packing Charged Extra, but only sufficient to cover cost of time and material consumed in the work.

Post Office Orders payable at Dresher P. O., Montgomery Co., Pa. Postal Telegraph Office, Dresher, Pa.

Visitors are always welcome and should take train at the Reading Terminal, 12th and Market Streets, Philadelphia, for **Camp Hill Station**, or at Broad Street Station, Pennsylvania R. R., for **Fort Hill Station**. Be sure that the train you take stops at these stations.

Notice.—It is necessary that you should **Telephone** us (Bell Phone, 226 Ambler; Keystone Phone, 652-Y), in advance of your coming, so that we can send a carriage to the station for you. Our office is 2½ miles from either station.

THE COMMONWEALTH OF PENNSYLVANIA

DEPARTMENT OF AGRICULTURE

Certificate of Inspection of Nursery Stock No. 1303.

This is to certify that the stock in the nursery of THOMAS MEEHAN & SONS, INC., of Dresher, County of Montgomery, State of Pennsylvania, was duly examined in compliance with the provisions of the Act of Legislature of Pennsylvania, approved the 31st day of March, A. D., 1905, and it was found to be apparently free from San Jose Scale and other dangerously injurious insect pest or pests.

This Certificate expires August 31, 1909.
Dated Harrisburg, Pa., Sept. 14, 1908.
P. H. HERTZOG, Inspector.

A. B. Critchfield,
Secretary of Agriculture

Deciduous Trees

The price of nursery stock is fixed according to the value of the tree offered. The value of the tree depends entirely upon the character of the stock and it is this "value" which makes prices differ in the catalogues of nurserymen. Stock that is sold at a low price is grown with the least possible expense put upon it, but at a sacrifice to the "quality." Stock that is thoroughly cultivated, grown in good soil, well manured and several times transplanted cannot be grown cheaply, but its "value" to the planter is increased, and in the long run such stock is cheaper than poorly grown stock at a "low price."

We bring up-to-date methods into the production of our goods. Our soil is especially adapted for the growing of good nursery stock. We spend thousands of dollars yearly in manures and in cultivating; besides this our trees are frequently transplanted. We cull out and burn all crooked and imperfect trees so that our customers receive full value for the prices charged.

Intending purchasers of nursery stock should keep this in mind when comparing our prices with others. A visit to our nurseries will convince any one of the statement we make.

We call particular attention of customers to the trees marked "Specimens." These are trees that have been frequently transplanted, set wide apart in nursery rows and are well developed in every way.

2½ to 3 in. calliper, high branched.....	250 00

These trees marked as "high branched" are so marked so as to identify them from the other stock. They are really branched about six to ten feet from the ground, and are particularly fine for street and avenue planting. The trees were transplanted two years ago. Purchasers must identify these trees when placing their order, otherwise regular stock will be shipped.

JAPANESE MAPLES

Our Japanese Maples are not imported stock. They are propagated and grown here. Imported stock is poorly rooted, hide-bound and of irregular shape. It rarely succeeds and is frequently not true to name. We have been propagating our own Japanese Maples for thirty-five years and our stock will succeed where imported plants fail. The polymorphum atropurpureum are grown from layers, consequently on their own roots, and are very bushy plants. The pot grown plants are especially adapted for fall planting. They will be shipped with the ball unbroken.

All of the above Magnolias are of our own propagating and grown from layers, and are on their own roots. These are much healthier and better than imported stock; this is especially the case with the Halleana. Each plant will be dug with a ball of earth and the ball sewed in burlap. The *conspicua* are the true pure white variety.

OAKS

Years ago we began advocating the planting of Oaks for all general purposes; now planters realize their merits. Now they are used for every purpose. They are planted on boulevards, avenues in parks and cemeteries and more recently in the cities. It makes a permanent tree, very free from in-

sects and is unsurpassed by any other shade tree. The Pin Oak is particularly adapted for side-walk planting in cities and seems to thrive under the adverse conditions usually found in such places.

The <i>Ulmus parvifolia</i> is a Japanese species, very hardy in this country. It does not make a large tree, but is of a dense growing habit. The leaves are small and of a bright shiny green and remain on the tree late into the fall. It is a valuable variety for ornamental planting.

Deciduous Shrubs

The height of a shrub does not indicate its value to a customer when making comparison in prices. Some nurserymen plant their shrubs thickly in the nursery rows, thereby gaining height, but such shrubs are not bushy. A shrub that is given ample room to develop bushiness will not make the same height in a given time as those which have been planted closely together. We set our shrubs wide apart in the rows and our plants are all good bushy stock; our prices are based on this fact, and customers are given full value for the prices we charge. The shrubs marked "specimens" are large, well developed plants, that have been given ample room in the nursery rows to fully develop, they have been several times transplanted, and they are exceptionally fine shrubs for immediate effect.

HIBISCUS MEEHANI VARIEGATA
NEW SINGLE FLOWERED VARIEGATED LEAVED
ALTHAEA

This is a new variety of the variegated leaved Althaea, the foliage showing the white and yellow variegation of the old variety, but which differs from the old variety inasmuch as the flowers open wide, and in a strong vigorous plant they are about four to five inches in diameter, while on the old variety the flowers do not open at all, but look like purple buttons.

The flower is of a purplish red color, single, and the plant blooms profusely.

This new variety of our common garden Althaea will be found perfectly hardy everywhere the old variety has proven so.

" opulus nanus, Dwarf Snowball	
6 to 12 in.....	12 50
<p>In many parts of the United States and Canada, Box Edging is not hardy, and a low, dwarf and compact plant is required as a substitute for it. The <i>Viburnum opulus nanus</i> has been found to be an excellent substitute for the Box Edging. It is naturally of a dwarf habit and will stand a lot of shearing, so that it can be kept down to a very small size. It does not bear any flowers and the leaves are smaller than the other varieties of <i>Viburnum</i>. It is perfectly hardy and can be planted in any part of the United States and Canada.</p>

“ tomentosum	
18 to 24 in.....	12 50
3 to 4 ft.....	20 00
4 to 5 ft.....	25 00
<p>The <i>Viburnum tomentosum</i> is of a similar character and habit to the <i>Viburnum plicatum</i>, but instead of having balls of flowers, they are flat headed. In leaf and general growth it is about the same as the <i>plicatum</i>, and in fact it is frequently mistaken for that variety. It is perhaps a little stronger grower than the <i>plicatum</i>, and in some respects it is to be preferred. We have a particularly large and fine stock of this plant, and call attention to some of the specimen plants which we offer.</p>

Evergreens

All of our evergreens are specimens. Every tree is given careful attention and such varieties as *Retinisporas*, etc., requiring it, are sheared as often as necessary in order to produce a bushy symmetrical tree. They are all branched to the ground. We frequently transplant our evergreens and in that way, we get a mass of fibrous roots. In nearly every case, as noted in the catalogue, the trees will be dug with a ball of earth and the ball sewed in burlap. This makes the transplanting of them almost an assured success. Of course, the first cost of these evergreens dug and handled in this way, is more than common, but as the planter has practically no loss with them, he is saving money in the long run. Our stock must not be confused with low priced evergreens rarely transplanted and grown thickly together.

Visitors to our nurseries have been greatly interested and pleased with this Juniper, which has not been found in any other nursery. The habit is like a sheared pyramidal tree box. The foliage is of a bright green color, very compact and somewhat of the character of a Chinese Juniper. It makes an excellent tub plant, or for use where an evergreen of formal character is required.

5 year	8 00

Vines and Climbers

For Fall planting, our "pot-grown vines" are much more desirable than field grown stock. They have been established in pots all Summer, they are heavily rooted, and are less likely to "heave out" by frost in the Winter. We introduced this method of growing vines many years ago and customers now prefer it to field-grown stock for Fall work. When shipping, we knock them out of the clay pots and send in paper pots.

Hardy Herbaceous Perennials, Ornamental Grasses and Ferns

The following is a list of stock we can supply in quantity. In addition, our immense collections contain many choice kinds not here mentioned.

Send us your list of wants and let us quote upon them.

We aim to grow only first class stock and send out neither old clumps of low vitality nor microscopic divisions, but young, vigorous plants that will give immediate results.

Our standard, where kind will allow, is one year, field grown.

PRICES

All orders, regardless of quantities, will be billed at the rate quoted per 100; but single plants will not be furnished at less than 10 cents each.

Nurserymen's Supplies

The Best Nursery Spade

Either Square or Taper Blade

Send Your Order Now. Don't Leave It Too Late

D Handle, Double Strap, Reinforced Nursery Spade. Weight, 9½ lbs.

We have experimented with a number of different makes of nursery spades, but find this to be the strongest, best and most durable on the market. We have been using this spade for a number of years, and it will stand more hard work than any other make. It is strapped full length of handle, both back and front, and half way up it has double straps, strengthening it in what otherwise would be its weakest parts. When ordering state if straight or taper blade is wanted. **\$1.50 each; \$17.50 per doz.**

"Dig Ezy" Nursery Hoe

For general nursery purposes and particularly for hoeing where plants are set close in nursery rows and the soil is

light, there is no tool equal to the "Dig Ezy" hoe. It is not an experiment, as this hoe has been in use in nurseries for some time. For use among small fruits, cuttings and herbaceous plants, it is unquestionably the best tool for the purpose. It is made of the best material, double riveted and balanced exactly right. Blades are 1⅜ and 3½ inches wide.

Price, 65c. each; \$5.50 per dozen.

Field or Garden Hoe

In the North this pattern is claimed as the standard field and garden hoe. It is of medium weight, nicely constructed, and is hung in correct balance. For general purposes this is the best hoe. They are made of the best material and will outwear two or three ordinary grades of hoes. The blade is 8 inches wide. After trying different makes of hoes, we have found it economy to use this one in our own nurseries. **Price, 55c. each; \$6.00 per dozen.**

Handled Eye Hoe

In new ground where there are lots of sprouts and roots, and also in rough clay soil, this pattern of hoe is particularly desirable. It is of a medium weight, and made extra heavy and strong throughout to stand heavy work. The blades are 4 inches wide. **Price, 60c. each; \$6.50 per dozen.**

NURSERYMEN'S SUPPLIES—Continued

Raffia

The **Red Star Brand** of Raffia is a favorite among nurserymen. It is so well adapted for their use that a majority of them will use no other brand.

It is of a good, even, dependable grade and guaranteed quality. Strands are of good length, strength and color, also soft and pliable. By guaranteed quality we mean that quality must be first-class or we will replace any that may prove inferior. You assume no risk whatever.

Pruning Shears, Budding and Pruning Knives

The shears and knives offered, excepting the "Empire," are the celebrated "Maher & Grosh" make, which is sufficient guarantee of their excellence. No better knives are made. All blades are guaranteed "razor steel" and have been thoroughly tested.

Bear in mind, our prices are for the goods **POSTPAID** at your risk. If you wish them by registered mail add eight cents to your order.

PRICES INCLUDE POSTAGE

- Pruning Knife "A,"** **75c. each, 6 for \$3.75**
 This is the best light-weight pruning knife on the market, and is suited to all general work. Ebony handle.
- Pruning Knife "B,"** **85c. each, 6 for \$4.75**
 Round handle, steel cap on end. Strong blade. Made for nurserymen who want a strong tool and keen edge. Blade oil tempered. The strongest pruning knife made.
- Special Budding Knife,** **50c. each, 6 for \$2.75**
 This is a very fine budding knife—in fact, one of the best budding knives on the market. The blade closes and is of the very best razor steel; it has a smooth, polished, white bone handle, and tapered at the end for raising the bark. It is very neat and handy. A knife well worth the price.
- Budding Knife "C,"** **25c. each, 6 for \$1.30**
 Stationary blade. High temper, equal to any razor.
- Budding Knife "D,"** **35c. each, 6 for \$2.00**
 Cocoa handle, razor steel. Blade closes. The end of the handle is tapered to form a wedge for raising the bark.
- Pruning Shears "E,"** **75c. each, 6 for \$3.90**
 These are A No. 1 in quality and are the kind in general use.
- Pruning Shears "F,"** **\$1.00 each, 6 for \$5.75**
 This is a forged steel pruner, patent spring of wonderfully easy but powerful working capacity. There is not a stronger or better pruning shear on the market. It will out-wear two of any other style. The best is the cheapest in the end.

NURSERYMEN'S SUPPLIES—Continued**Fruit Seeds**

While fruit seeds this year are rather scarce, and prices somewhat high, we have been able to arrange for our usual supply of the following seeds, so that we can quote the following prices, which, in view of the conditions, are very reasonable:

Apple, French Crab (ready about Feb. 15th).—40c. per lb., 1 bu. at \$13.00, 3 bus. at \$11.50 per bu., 5 bus. at \$10.50 per bu., 10 bus. and over at \$9.50 per bu.

Peach Pits (Tenn. Natural).—40c. per lb., \$1.75 per bu., 25 bus. and over at \$1.60 per bu.

Mahaleb Cherry (ready now).—40c. per lb., \$17.00 per bu., 3 bus. and over \$16.00 per bu.

Pear, French (ready about Feb. 15th).—\$1.50 per lb., 5 lbs. at \$1.25 per lb., 10 lbs. and over at \$1.00 per lb.

Quince (ready about Feb. 15th).—\$1.50 per lb., 5 lbs. at \$1.25 per lb., 10 lbs. and over at \$1.00 per lb.

These seeds are all of this season's crop and of the very best quality.

Tree and Shrub Seeds

We issue a special catalogue of these. It will be mailed on application.

Manetti Rose Stocks**SPECIAL FLORISTS' GRADE**

Especially graded for grafting purposes. They are of a medium size, nicely rooted, and average about one-fifth of an inch—just right for potting in 2½ inch pots. For early orders we quote the following prices:

\$7.50 per 1,000; \$7.00 per 1,000 in lots of 10,000 or over

Place your orders immediately. Stocks will be ready for delivery about the middle of December.

Labels

The following are the kinds mostly used by nurserymen. For 10,000 or more we allow a discount of 10 per cent. 1,000 of 3½-inch and 100 6-inch in a package. Not less than a full package sold.

3½-inch, notched, iron-wired, painted	. . .	\$1.00 per 1000
3½ " " copper-wired, painted	. . .	1.25 "
6 " " painted, but not wired	. . .	2.35 "
6 " " not painted nor wired	. . .	1.75 "

Nursery Book

By Prof. L. H. BAILEY

This is a standard work of reference and is essential to every nurseryman. Thoroughly practical, and describes fully and clearly the processes of budding, grafting, seed-sowing, etc., as well as many other important items of nursery work, with convenient indexes, etc. 365 pages, 162 illustrations.

Price, post-paid, \$1.00

Retinispora pisifera aurea

This photograph of a specimen plant was taken last year. Since then the trees have been sheared again and now they are even more dense than the illustration represents.

We have probably the finest lot of specimen evergreens of certain varieties to be found in this country. The plants have been transplanted and sheared every two years. They are set wide apart in nursery rows and are perfect specimens all around and from the ground to the top of the plant.

When shipping this stock the plants are dug with a large ball of earth and the ball sewed in burlap, and failure in transplanting is almost unknown.

We have these specimens mainly in the following varieties, some of the plants as tall as 10 to 11 feet:

WALES' WEEPING NORWAY SPRUCE

RETINISPORAS IN GREEN, GOLDEN and BLUE VARIETIES

ARBOR-VITÆ—AMERICAN, PYRAMIDAL and GEORGE PEABODY GOLDEN

Many other Varieties in Specimens of Smaller Sizes

For varieties, sizes and prices, see Evergreen Section of Catalogue.

MEEHANS' MALLOW MARVELS

RICH, GORGEOUS, HARDY
PERENNIAL CREATION

*Most Brilliant New Production of
Scientific Plant Breeding*

ABLAZE with their immense, brilliant flowers, our field of Mallow Marvels, when in flower, was a sight to behold. Immense flowers from eight to ten inches in diameter, in fiery crimson, rich blood-red, soft shell-pink and clear snowy white. Their great beauty is indescribable. It seems impossible to reproduce the glorious colors of the flowers and the illustration on the front cover conveys a very poor idea of their actual beauty. They must be seen to be fully appreciated.

Visitors to our nurseries are amazed at the wonderful show. Meehans' Mallow Marvels surpass all other perennials in profuseness of bloom, flowering propensities and brilliancy of color. From late July until October frosts arrive, the flowers continue to appear in profusion.

A hybrid of our own production and brought up to its present point of form, color and beauty by careful seed selection, covering a period of several years.

Absolutely hardy, the Mallow Marvels have been tested and are thriving in Canada and in the mountain portions of the Northern States, as successfully as in Georgia and Florida. Of herbaceous character. They come up year after year and thrive under varied conditions.

Prices for Strong Two-Year-Old Roots

	Each
Crimson Marvel (shades of Crimson)	\$1.50
Red Marvel (shades of Red)	1.50
White Marvel	1.50
Pink Marvel (shades of Pink)	1.00
